

QUESTIONING FORENSICS: INSIDE THE BLACK BOX

The DNA Unit invites you to our second annual intensive CLE. This year, not only will we train you in the fundamentals of litigating DNA evidence, we'll go beyond DNA and explore some of the new and secretive technologies being used in our cases.

Once again this year, we have renowned speakers joining us from around the country to explain new high tech forensic tools such as likelihood ratio and predictive policing software, stingray and other surveillance technology. We'll show you how to identify, analyze, and litigate the new trend of "black box" forensic science.

Please contact Julie Fry (JNFry@legal-aid.org) by October 7th to reserve your spot

OCTOBER 27th & 28th
CARDOZO LAW SCHOOL
