

DNA Mapping the Crime Scene: Do Computers Dream of Electric Peaks?

23rd International Symposium
on Human Identification
October, 2012
Nashville, TN

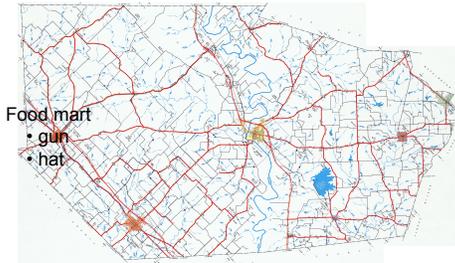

Mark W Perlin, PhD, MD, PhD
Cybergenetics, Pittsburgh, PA

Gang crime

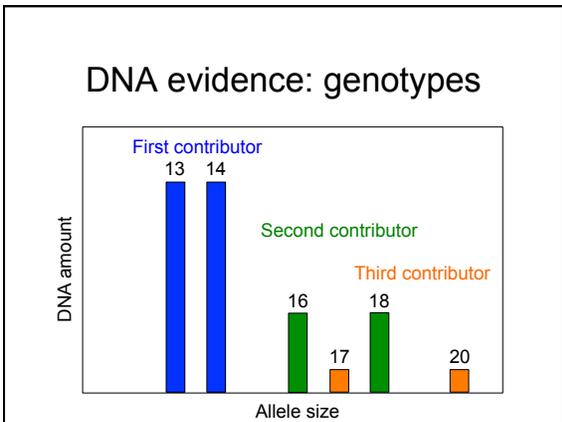

Escalation

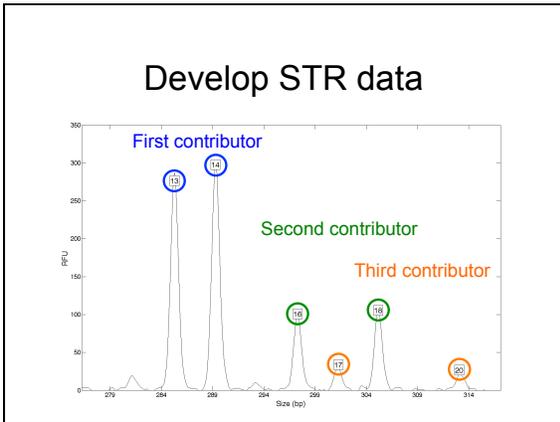

Develop STR data

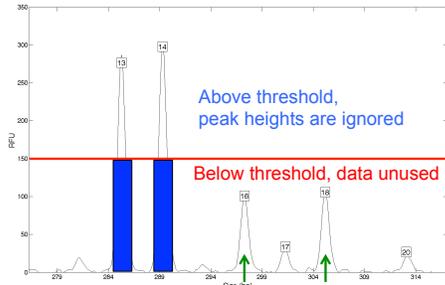

Laboratory processing

- | | |
|--------------------|--------------------|
| 12 evidence items | 10 reference items |
| Scene 1 • gun | 5 victims |
| Scene 1 • hat | • V1 |
| Scene 2 • safe | • V2 |
| Scene 2 • phone | • V3 |
| Scene 3 • counter | • V4 |
| Scene 3 • safe | • V5 |
| Scene 4 • keys | 5 suspects |
| Scene 4 • tape | • S1 |
| Scene 5 • hat 1 | • S2 |
| Scene 5 • hat 2 | • S3 |
| Scene 5 • overalls | • S4 |
| Scene 5 • shirt | • S5 |

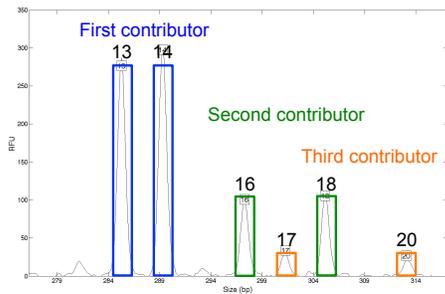

DNA match questions

log(LR)	Suspect 1	Suspect 2	Suspect 3	Suspect 4	Suspect 5
1. Gun					
1. Hat					
2. Safe					
2. Phone					
3. Counter					
3. Safe					
4. Keys					
4. Tape					
5. Hat 1					
5. Hat 2					
5. Overalls					
5. Shirt					

Human review: no results

Computers dream of electric peaks

TrueAllele® computes genotypes

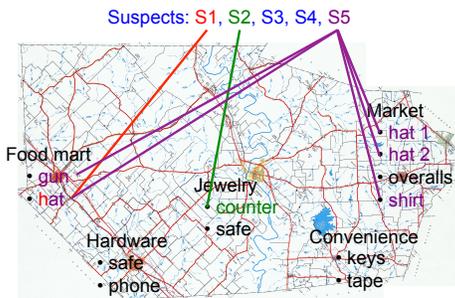

For each contributor, at every locus

Allele pair	Probability
16, 18	65%
14, 18	12%
13, 18	10%
18, 20	8%
17, 18	4%

TrueAllele match answers

log(LR)	Suspect 1	Suspect 2	Suspect 3	Suspect 4	Suspect 5
1. Gun					4
1. Hat	3				4
2. Safe					
2. Phone					
3. Counter		6			
3. Safe					
4. Keys					
4. Tape					
5. Hat 1					6
5. Hat 2					
5. Overalls					11
5. Shirt					3

DNA mapping the crime scene

Report results in court

A match between the evidence and the suspect is 12.3 trillion times more probable than a coincidental match to an unrelated Caucasian person

M. W. Perlin, "Easy reporting of hard DNA: computer comfort in the courtroom," *Forensic Magazine*, vol. 9, pp. 32-37, 2012.

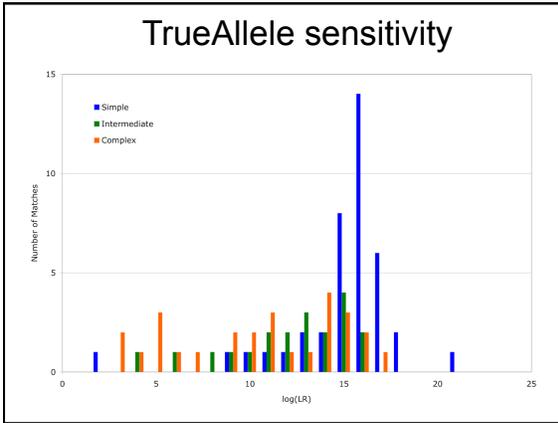

TrueAllele reliability

TrueAllele sensitivity

TrueAllele specificity

TrueAllele in criminal trials

Over 100 case reports filed on DNA evidence

<p>Court testimony:</p> <ul style="list-style-type: none"> • state • federal • military • foreign 	<p>Crimes:</p> <ul style="list-style-type: none"> • armed robbery • child abduction • child molestation • murder • rape • terrorism • weapons
--	---

Poster 96 M. W. Perlin, "The Blairsville slaying and the dawn of DNA computing," in *Death Needs Answers: The Cold-Blooded Murder of Dr. John Yelenic*, A. Niapas, New Kensington, PA: Grelin Press, 2012.

TrueAllele precedent

Commonwealth of Pennsylvania v. Kevin James Foley
Superior Court, 2012

Future of DNA evidence

SWGAM 2010: DNA mixture interpretation guidelines
wake-up call: interpretation of complex DNA mixtures must account for **data uncertainty**

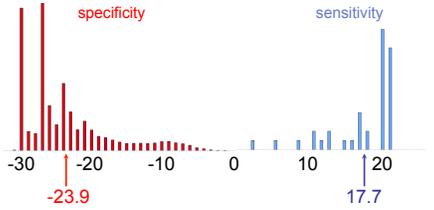

- end of older, less reliable, human review methods
- beginning of more reliable computer interpretation

§ 3.2.2 "probabilistic genotypes" & computers

M. W. Perlin, "Investigative DNA databases that preserve identification information," *American Academy of Forensic Sciences 64th Annual Meeting*, Atlanta, GA, 2012.

Genotype information database

Compare with 1,000 random genotypes

TrueAllele computer age

Objective, reliable truth-seeking tool

- solves the DNA mixture problem
- handles low-copy and degraded DNA
- provides accurate DNA match statistics
- automates DNA evidence interpretation

Currently used to:

- eliminate DNA backlogs
- reduce forensic costs
- solve crimes
- find criminals
- convict the guilty
- free the innocent
- create a safer society
