---

## Identification

Everyone has a nose

nose

---

---

---

---

---

---

---

---

## Match

Same person?  
Or coincidence?

nose

---

---

---

---

---

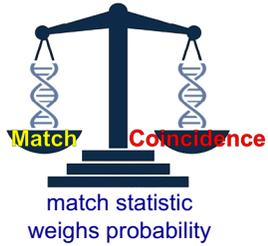

---

---

---

## Information

A balance of probability

---

---

---

---

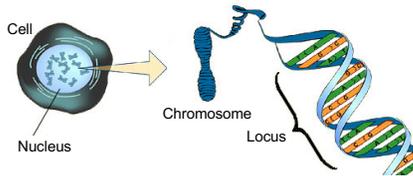

---

---

---

---

## DNA biology

---

---

---

---

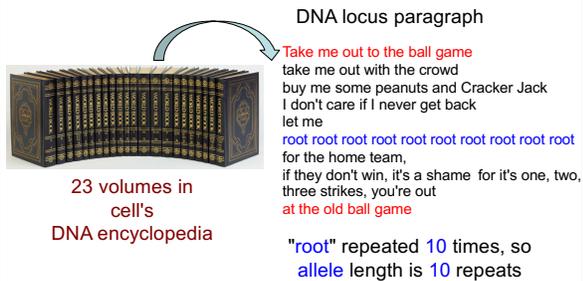

---

---

---

---

## Short tandem repeat

---

---

---

---

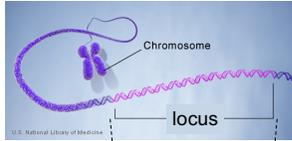

---

---

---

---

## DNA genotype

mother allele

father allele

A genetic locus has two DNA sentences, one from each parent.

An **allele** is the number of repeated words.

A **genotype** at a locus is a pair of alleles.

**10, 12**

Many alleles allow for many many allele pairs. A person's genotype is relatively unique.

---

---

---

---

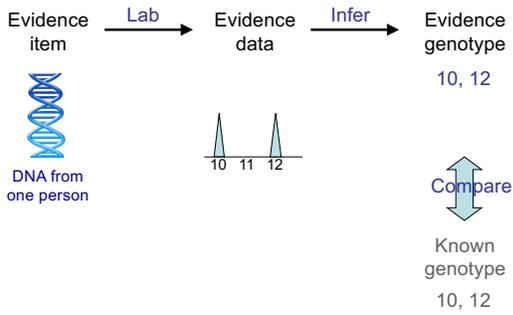

---

---

---

---

## Simple DNA interpretation

---

---

---

---

---

---

---

---

## Pittsburgh skyline

---

---

---

---

---

---

---

---

Draw a threshold

---

---

---

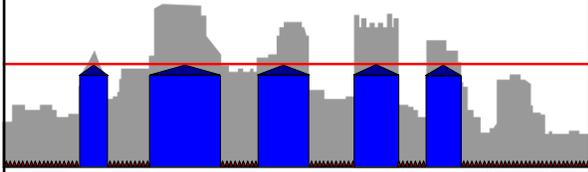

---

---

---

---

Same heights & vacant lots

---

---

---

---

---

---

---

DNA mixture

eye of newt

toe of frog

Double, double toil and trouble

---

---

---

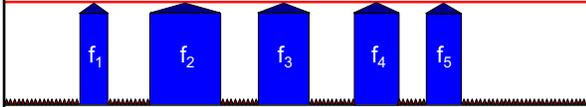

---

---

---

---

## Simplify data to interpret mixture

1. Apply threshold to find "alleles"
2. Add allele frequencies ( $f_1 + f_2 + \dots$ )
3. Square sum, take reciprocal
4. Locus "probability of inclusion" (PI)
5. Multiply locus PI values
6. **Combined (CPI) match statistic**

---

---

---

---

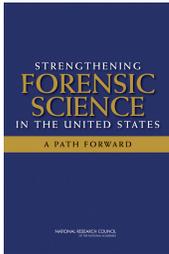

---

---

---

---

## National Academy of Sciences

Trouble in River  
City  
2009

Where's the  
"science" in  
Forensic Science?

---

---

---

---

---

---

---

---

## Unreliable DNA mixture statistics

NIST (Commerce Department) study in 2005  
Two contributor mixture data, known victim

Some Differences in Reporting Statistics

| LabID | Kits Used      | Case1      |                   |             |
|-------|----------------|------------|-------------------|-------------|
|       |                | Caucasians | African-Americans | Hispanics   |
| 90    | ProPlus/Ceiler | 1.18E+15   | 2.13E+14          | 3.09E+15    |
| 34    | ProPlus/Ceiler | 2.40E+11   | 7.99E+09          | 9.99E+10    |
| 33    | ProPlus/Ceiler | 2.94E+08   | 1.12E+08          | 1.74E+09    |
| 6     | ProPlus/Ceiler | 40,000,000 | 3,500,000         | 280,000,000 |
| 9     | ProPlus/Ceiler | 1.14E+07   | 1.97E+07          | 1.54E+08    |
| 29    | ProPlus/Ceiler | 530,000    | 4,999             | 1,350,000   |
| 16    | ProPlus/Ceiler | 434,600    | 31,710            | 399,100     |

Remember that these labs are interpreting the same MIX05 electropherograms

When not  
"inconclusive":

213 trillion (14)

31 thousand (4)

Forensic DNA labs put on notice ten years ago

---

---

---

---

---

---

---

---

## Biased DNA workflow

Choose data      Person decides      Calculate statistic

- Put people in the process
- To overcome software limits
- And introduce human bias

---

---

---

---

---

---

---

---

## Falsely identify innocent people

### MIX13 Case 5 Outcomes with Suspect C (whose genotypes were not present in the mixture)

| # Labs | Report Conclusions                          | Reasons given   |
|--------|---|---|
| 6      | Exclude Suspect C                           | detailed genotype checks (ID+); TrueAllele negative LR (ID+); assumed major/minor and suspects did not fit (ID+); 3 labs noted Penta E missing allele 15 (PP16HS) |
| 3      | Inconclusive with C only (A & B included)   | All these labs used PP16HS  |
| 21     | Inconclusive for A, B, and C                |   |
| 70     | <b>Include &amp; provide CPI statistics</b> | All over the road...  |

Range of CPI stats for Caucasian population:  
FBI allele frequencies: **1 in 9** to **1 in 344,000**

---

---

---

---

---

---

---

---

## Mixture statistic shuts down labs

“National accreditation board suspends all DNA testing at D.C. crime lab”  
*The Washington Post* April 27, 2015  
Did not comply with FBI standards

“New protocol leads to reviews of ‘mixed DNA’ evidence”  
*The Texas Tribune* September 12, 2015  
24,468 lab tests affected

---

---

---

---

---

---

---

---

## Statistics lack scientific basis

Misled courts for 15 years on countless DNA mixtures

---

---

---

---

---

---

---

## Human mixture interpretation

- Inaccurate. Disagrees with true information
- Subjective. Workflow introduces human bias
- Widespread. Hundreds of thousands of cases
- Opaque. Choices use only some of the data
- Biased. Can only include – or give no answer

**Inconclusive**

---

---

---

---

---

---

---

---

## TrueAllele<sup>®</sup> computer technology

- Accurate. 34 validation studies, 7 published
- Objective. Workflow removes human bias
- Accepted. Reported in 37 states, used by labs
- Transparent. Give math, software (4GB DVD)
- Neutral. Can statistically include or exclude

**Informative**

---

---

---

---

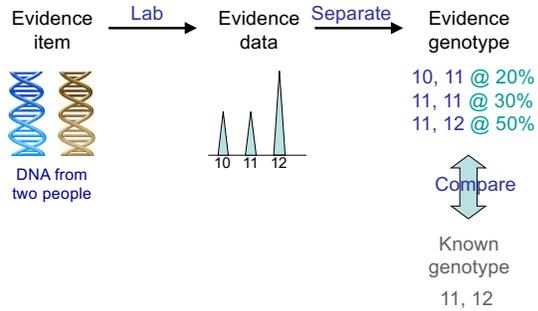

---

---

---

---

## DNA mixture interpretation

---

---

---

---

---

---

---

---

## Pennsylvania v. Kevin Foley

Apr 2006: Blairsville Dentist John Yelenic murdered

Nov 2007: Trooper Kevin Foley charged with crime

February 2008: Defense questions 13,000 DNA match score

March 2009: Jury hears 189,000,000,000 TrueAllele statistic

---

---

---

---

---

---

---

---

## Pennsylvania v. Joshua Huber

| Item        | Description                          | Melissa Zuk      | Derek Schindler  | Joshua Huber     |
|-------------|--------------------------------------|------------------|------------------|------------------|
| 13E         | Living room wall bloodstain          | 1 in 160 million | 1 in 36 thousand | 11.6 quintillion |
| 29A         | Schindler's right hand fingernails   |                  | 1.37 quintillion | 53.8 thousand    |
| 1603461-13A | Left hand fingernails of Melissa Zuk | 17.4 billion     |                  | 3.35 thousand    |

---

---

---

---

---

---

---

## Virginia v. David Black

| Item | Description                  | David Black      | Bonnie Black | BettyAnn Armstrong | Craig Black     | Eleanora Black |
|------|------------------------------|------------------|--------------|--------------------|-----------------|----------------|
| 08   | Baseball hat velcro strap    | 32.5 quintillion | 16.1 billion |                    | 1/1.83 thousand | 1/62.6         |
| 94   | Master bedroom light switch  | 364 million      | 8.14 million |                    |                 |                |
| 95   | Master bathroom light switch | 1/19.5           | 554 million  |                    |                 | 3.63 million   |

---

---

---

---

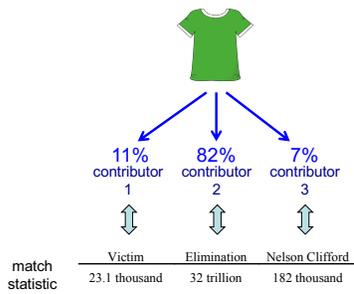

---

---

---

---

## Maryland v. Nelson Clifford

---

---

---

---

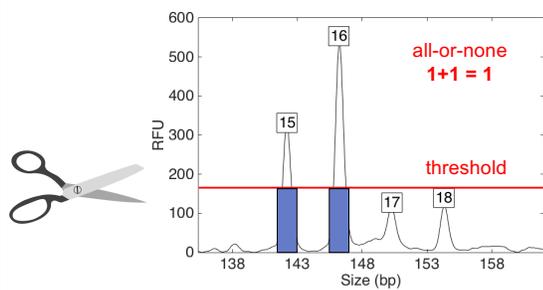

---

---

---

---

## Crime labs don't use all DNA data

---

---

---

---

---

---

---

---

## Wolfe sisters homicide

On February 6, 2014, Susan Wolfe (44) and her younger sister Sarah (38, left) were killed in their East Liberty home in Pittsburgh.

---

---

---

---

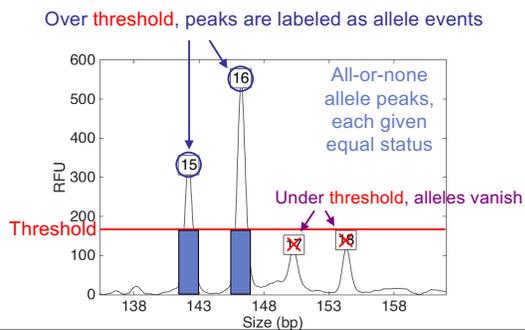

---

---

---

---

## Crime lab didn't use all DNA data

---

---

---

---

---

---

---

---

## Pennsylvania v. Allen Wade

Thresholds failed to interpret most DNA mixtures

|             |                                  |
|-------------|----------------------------------|
| Hat         | No conclusions                   |
| Cup         | Insufficient data                |
| Fingernails | Contamination, insufficient data |
| Gear shift  | Insufficient data                |
| Seat lever  | Cannot be excluded               |
| Knit hat    | Insufficient data                |
| Sock        | Too complex, no conclusions      |

---

---

---

---

---

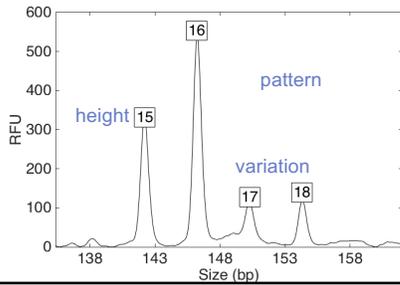

---

---

---

## Computers can use all the data

Quantitative peaks at locus vWA

---

---

---

---

---

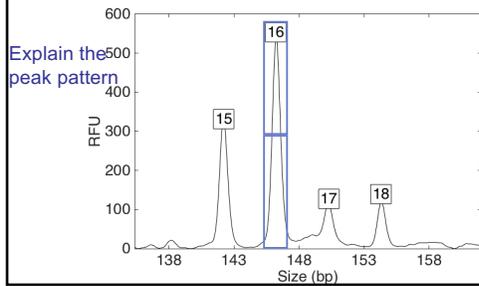

---

---

---

## How the computer thinks

Propose genotype solutions

---

---

---

---

---

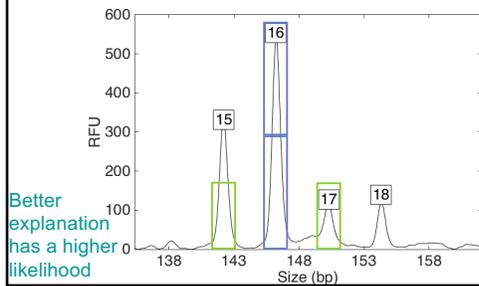

---

---

---

## How the computer thinks

Add together contributor genotypes

---

---

---

---

---

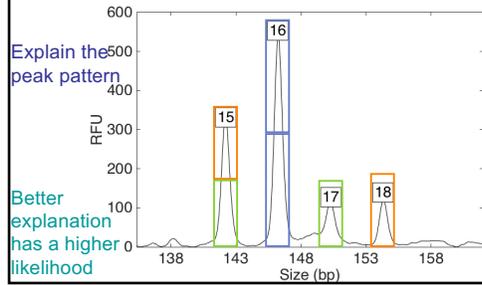

---

---

---

## How the computer thinks

Consider every possible genotype solution

---

---

---

---

---

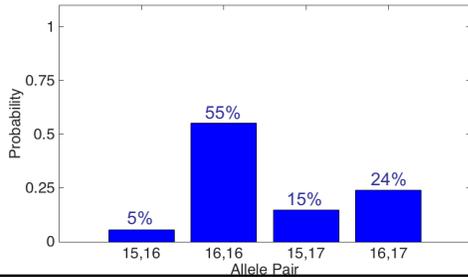

---

---

---

## Evidence genotype

**Objective** genotype determined solely from the DNA data.  
Never sees a comparison reference.

---

---

---

---

---

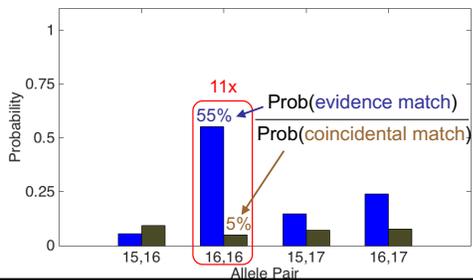

---

---

---

## DNA match information

How much more does the **suspect match** the evidence than a **random person**?

---

---

---

---

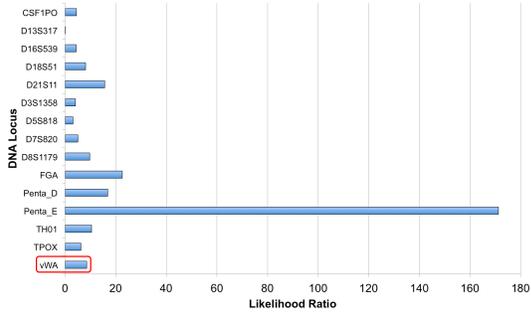

---

---

---

---

## Match information at 15 loci

---

---

---

---

---

---

---

---

## Is the suspect in the evidence?

A match between the right fingernails and Allen Wade is:

6.06 trillion times more probable than a coincidental match to an unrelated Black person

32.5 trillion times more probable than a coincidental match to an unrelated Caucasian person

8 trillion times more probable than a coincidental match to an unrelated Hispanic person

---

---

---

---

---

---

---

---

## Pennsylvania v. Allen Wade

The crime lab reported 5 DNA mixture matches  
TrueAllele found 17 matches on the same data

|             |               |             |
|-------------|---------------|-------------|
| Hat         | 65.3 thousand | Allen Wade  |
| Cup         | 20.5 thousand | Susan Wolfe |
| Fingernails | 6.06 trillion | Allen Wade  |
| Gear shift  | 9.37 million  | Sarah Wolfe |
| Seat lever  | 385 billion   | Sarah Wolfe |
| Knit hat    | 25.7 thousand | Allen Wade  |
| Sock        | 300           | Sarah Wolfe |

---

---

---

---

---

---

---

---

## Allen Wade Found Guilty On All Counts In East Liberty Sisters' Slaying

CBS News, May 23, 2016

PITTSBURGH (KDKA/AP)

- A man accused of killing two sisters who lived next door to him in East Liberty has been found guilty on all counts.
- Allen Wade was accused of shooting Sarah and Susan Wolfe after they returned from work on Feb. 6, 2014, apparently to steal a bank card.
- On Monday morning, a jury found Wade guilty of first-degree murder, robbery, burglary and theft by unlawful taking.

---

---

---

---

---

---

---

---

## Pennsylvania v. Allen Wade

Thresholds failed to interpret DNA mixture  
TrueAllele succeeded on the same data

A hat left from a burglary of the Wolfe sister's home  
six weeks before the murder matched  
Allen Wade with a 65.3 thousand statistic

**Preventable Crime**

---

---

---

---

---

---

---

---

## No information from mixture

Crime laboratory DNA report  
Crime lab user fee: \$5,000

### Conclusions:

#### Item 1 – Swab of textured areas from a handgun

The data indicates that DNA from four (4) or more contributors was obtained from the swab of the handgun. Due to the complexity of the data, **no conclusions can be made** regarding persons A and B as possible contributors to this mixture.

# Pursue the past

**Pittsburgh Post-Gazette**

**Allegheny County crime lab vying to use more advanced DNA database**

Technology developed by Cybergenetics gets conclusive results from DNA mixtures

February 28, 2014

---

---

---

---

---

---

---

---

---

---

## Darryl Pinkins imprisoned

1989 – 5 men raped an Indiana woman  
Darryl Pinkins and 2 others misidentified  
1991 – wrongfully convicted, 65 year sentence

2001 – DNA mixture evidence  
2 contributors found, not the accused  
but 5 were needed, post-conviction relief denied

---

---

---

---

---

---

---

---

## TrueAllele Pinkins findings

1. compared *evidence with evidence*
2. calculated *exclusionary match statistics*
3. revealed 5% *minor mixture contributor*
4. *jointly analyzed* DNA mixture data
5. showed three perpetrators were *brothers*

found 5 unidentified genotypes,  
defendants not linked to the crime

---

---

---

---

---

---

---

---

## Pinkins exonerated

---

---

---

---

---

---

---

---

## Why government DNA fails

- Crime lab culture  
Scientists vs. technicians
- Courtroom culture  
Lawyers vs. experts
- Protecting the past  
Fear of civil lawsuits
- Preserving the present  
Tight federal control
- Funding the future  
In government,  
*the problem is the solution*

---

---

---

---

---

---

---

---

## Non-governmental organization

JUSTICE  
THROUGH  
SCIENCE
