Time to change

Failure is not an option

Success is just a click away

- Forensic Science**
- serves society
 - empowers DNA
 - uses computers
 - unmixes mixtures
 - promotes justice

Fully Bayesian analysis

- **Input:** all mixture data
- Update all variables
- **Output:** separated genotypes
- Report likelihood ratio

Eliminate:

- Calibration bias
- "Picking & choosing" data
- Information loss
- "Inconclusive" results

All the genotypes, all the time

Ease of use

People see
the pictures

Computers crunch
the numbers

Easy to solve DNA problems, easy to testify about results

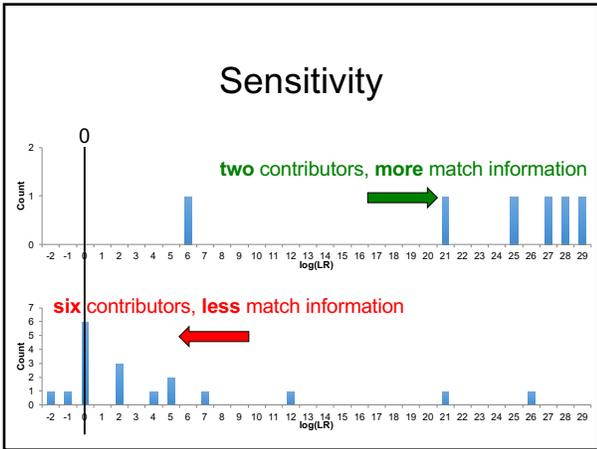

Validation study design

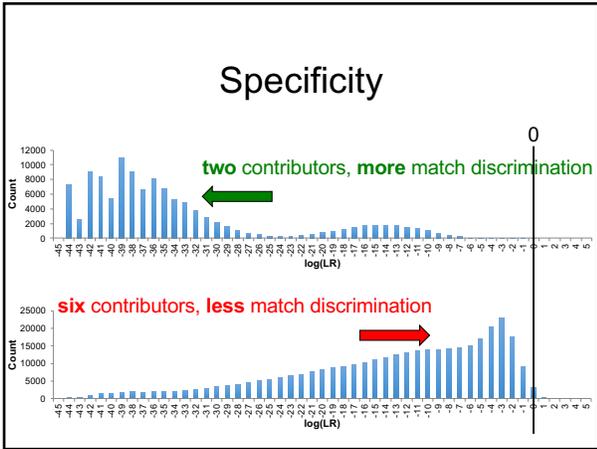

- 2 to 10 unknown contributors
demonstrate no limits
understand separation
- random mixtures
realistic composition
very low quantities
- independent analysis
results depend on system
not on lab or operator

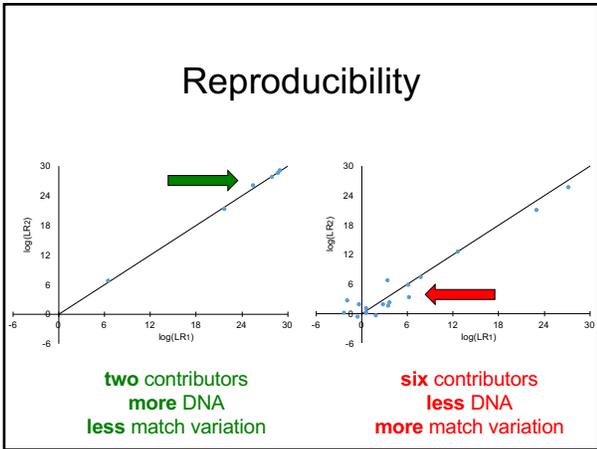

Overall findings

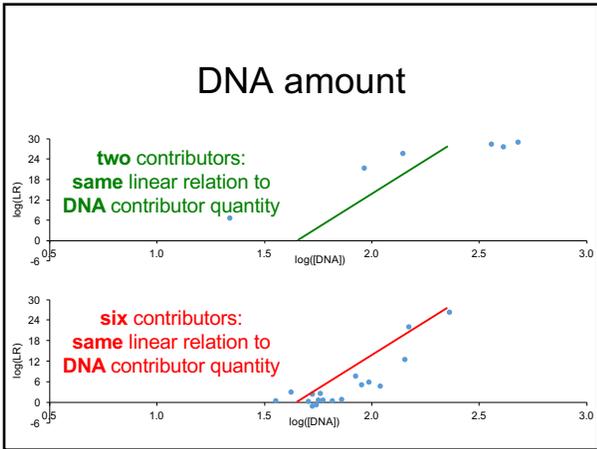

Sensitivity, specificity, reproducibility

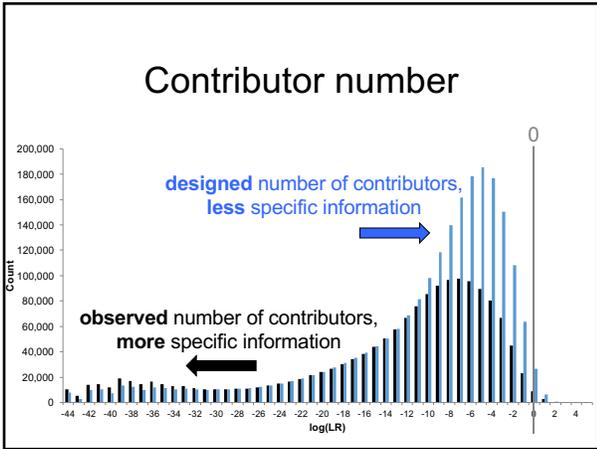

- More DNA, better metrics
- More contributors, less DNA
- More sampling, better metrics
- Observed number of contributors
- Excess contributors, same results
